

Leschi / Madison Park

Area: 014

Residential Revalue for 2015 Assessment Roll

Area 14 / Madison Park / Leschi is located east of the Seattle Central Business District and lies along the west shore of Lake Washington. It was among the first areas developed in Seattle. Approximately 96% of the parcels in this area are improved with single family dwellings and a majority portion of the remaining undeveloped land would be considered unbuildable. New construction typically follows a teardown of an existing improvement. The typical grade of homes in the area is 8 or 9 on a scale of 1-13. Approximately 36% of the parcels have some degree of view, most often of Lake Washington and Mount Rainier. High quality homes are scattered throughout the entire area but are most prevalent in the Washington Park and Denny Blaine neighborhoods. Broadmoor, a private, gated community which includes a golf course is in the northern portion of Area 14. Further South is Madrona Park and Leschi which extends south of I-90, and finally, in the Southern portion of Area 14 is the Mt. Baker neighborhood. A number of the homes in the area were early mansions which typically enjoy excellent views of Lake Washington, Mount Rainier and the Cascade Mountains. Many high quality luxury homes have been and continue to be built in this area. Waterfront properties run along Lake Washington along with a number of public parks and beaches. The Seattle Tennis Club also stands along the shores of Lake Washington in Area 14. It is a desirable area in which to live because of its proximity to downtown Seattle and its many parks and recreational opportunities .

Lloyd Hara
Assessor

Dear Property Owners:

Property assessments for the 2015 assessment year are being completed by my staff throughout the year and change of value notices are being mailed as neighborhoods are completed. We value property at fee simple, reflecting property at its highest and best use and following the requirement of RCW 84.40.030 to appraise property at true and fair value.

We have worked hard to implement your suggestions to place more information in an e-Environment to meet your needs for timely and accurate information. The following report summarizes the results of the 2015 assessment for this area. (See map within report). It is meant to provide you with helpful background information about the process used and basis for property assessments in your area.

Fair and uniform assessments set the foundation for effective government and I am pleased that we are able to make continuous and ongoing improvements to serve you.

Please feel welcome to call my staff if you have questions about the property assessment process and how it relates to your property.

Sincerely,

Lloyd Hara
Assessor

Glossary for Improved Sales

Condition: Relative to Age and Grade

1= Poor	Many repairs needed. Showing serious deterioration.
2= Fair	Some repairs needed immediately. Much deferred maintenance.
3= Average	Depending upon age of improvement; normal amount of upkeep for the age of the home.
4= Good	Condition above the norm for the age of the home. Indicates extra attention and care has been taken to maintain.
5= Very Good	Excellent maintenance and updating on home. Not a total renovation.

Residential Building Grades

Grades 1 - 3	Falls short of minimum building standards. Normally cabin or inferior structure.
Grade 4	Generally older low quality construction. Does not meet code.
Grade 5	Lower construction costs and workmanship. Small, simple design.
Grade 6	Lowest grade currently meeting building codes. Low quality materials, simple designs.
Grade 7	Average grade of construction and design. Commonly seen in plats and older subdivisions.
Grade 8	Just above average in construction and design. Usually better materials in both the exterior and interior finishes.
Grade 9	Better architectural design, with extra exterior and interior design and quality.
Grade 10	Homes of this quality generally have high quality features. Finish work is better, and more design quality is seen in the floor plans and larger square footage.
Grade 11	Custom design and higher quality finish work, with added amenities of solid woods, bathroom fixtures and more luxurious options.
Grade 12	Custom design and excellent builders. All materials are of the highest quality and all conveniences are present.
Grade 13	Generally custom designed and built. Approaching the Mansion level. Large amount of highest quality cabinet work, wood trim and marble; large entries.

Executive Summary

Leschi/ Madison Park - Area 014

Physical Inspection

Appraisal Date: 1/1/2015
Previous Physical Inspection: 2010/ 2007
Number of Improved Sales: 614
Range of Sale Dates: 1/1/2012 – 12/31/2014 Sales were time adjusted to 1/1/2015

Sales - Improved Valuation Change Summary:						
	Land	Improvements	Total	Mean Sale Price	Ratio	COD
2014 Value	\$534,700	\$616,700	\$1,151,400			12.57%
2015 Value	\$658,200	\$647,500	\$1,305,700	\$1,403,500	93.8%	10.32%
\$ Change	+\$123,500	+\$30,800	+\$154,300			
% Change	+23.1%	+5.0%	+13.4%			

Coefficient of Dispersion (COD) is a measure of the uniformity of the predicted assessed values for properties within this geographic area. The 2015 COD of 10.32% is an improvement from the previous COD of 12.57%. The lower the COD, the more uniform are the predicted assessed values. Assessment standards prescribed by the International Association of Assessing Officers identify that the COD in rural or diverse neighborhoods should be no more than 20%. The resulting COD meets or exceeds the industry assessment standards. Sales from 1/1/2012 to 12/31/2014 (at a minimum) were considered in all analysis. Sales were time adjusted to 1/1/2015

Population - Improved Valuation Change Summary:			
	Land	Improvements	Total
2014 Value	\$569,400	\$545,800	\$1,115,200
2015 Value	\$697,200	\$552,500	\$1,249,700
\$ Change	+\$127,800	+\$6,700	+\$134,500
% Change	+22.4%	+1.2%	+12.1%

Number of one to three unit residences in the population: 4,298

Physical Inspection Area:

State law requires that each property be physically inspected at least once during a 6 year revaluation cycle. During the recent inspection of Area 014 – Leschi/ Madison Park, appraisers were in the area, confirming data characteristics, developing new valuation models and selecting a new value for each property for the assessment year. For each of the subsequent years, the previous property values are statistically adjusted during each assessment period. Taxes are paid on total value, not on the separate amounts allocated to land and improvements.

The current physical inspection analysis for Area 014 indicated a substantial change was needed in the allocation of the land and improvement value as part of the total. Land is valued as though vacant and at its highest and best use. The improvement value is a residual remaining when land is subtracted from total value.

Sales Sample Representation of Population

Year Built or Renovated

Sales

Year Built/Ren	Frequency	% Sales Sample
1910	63	10.26%
1920	77	12.54%
1930	120	19.54%

1990	298	6.93%
2000	301	7.00%
2014	589	13.70%
	4,298	

Sales of new homes built over the last few years are over represented in this sample.

This is a common occurrence due to the fact that most new homes will sell shortly after completion. This over representation was found to have statistical significance and results are reflected in the model.

Sales Sample Representation of Population

Above Grade Living Area

Sales

AGLA	Frequency	% Sales Sample
500	0	0.00%
1,000	25	4.07%
1,500	86	14.01%
2,000	144	23.45%
2,500	150	24.43%
3,000	91	14.82%
3,500	52	8.47%

13	23	0.54%
4,298		

The sales sample frequency distribution follows the population distribution relatively closely with regard to Building Grades. This distribution is adequate for both accurate analysis and appraisals.

Physical Inspection Process

Effective Date of Appraisal: January 1, 2015

Date of Appraisal Report: June 4, 2015

Appraisal Team Members and Participation

The valuation for this area was done by the following Appraisal Team. The degree of participation varied according to individual skill in relevant areas and depending on the time they joined the team.

- Karen Anderson – Appraiser II: Team lead, coordination, valuation model development and testing. Land and total valuation appraisals. Sales verification, physical inspection and report writing.
- David Ek – Appraiser I: Sales verification, appraisal analysis, land appraisal, physical inspection and total valuation.
- David McCroskey – Appraiser I: Sales verification, appraisal analysis, land appraisal, physical inspection and total valuation.
- Adam Neel – Appraiser I: Sales verification, appraisal analysis, land appraisal, physical inspection and total valuation.
- Andrew Rose – Appraiser I: Sales verification, appraisal analysis, land appraisal, physical inspection and total valuation.

Sales Screening for Improved Parcel Analysis

In order to ensure that the Assessor's analysis of sales of improved properties best reflects the market value of the majority of the properties within an area, non-typical properties must be removed so a representative sales sample can be analyzed to determine the new valuation level. The following list illustrates examples of non-typical properties which are removed prior to the beginning of the analysis.

1. Vacant parcels
2. Mobile Home parcels
3. Multi-Parcel or Multi Building parcels
4. New construction where less than a 100% complete house was assessed for 2014
5. Existing residences where the data for 2014 is significantly different than the data for 2015 due to remodeling
6. Parcels with improvement values, but no characteristics
7. Parcels with either land or improvement values of \$10,000 or less posted for the 2014 Assessment Roll
8. Short sales, financial institution re-sales and foreclosure sales verified or appearing to be not at market
9. Others as identified in the sales removed list

(See the attached Improved Sales Used in this Physical Inspection Analysis and Improved Sales Removed from this Physical Inspection Analysis for more detailed information)

Highest and Best Use Analysis

As If Vacant: Market analysis of the area, together with current zoning and current and anticipated use patterns, indicate the highest and best use of the overwhelming majority of the appraised parcels is single family residential. Any other opinion of highest and best use is specifically noted in our records, and would form the basis for the valuation of that specific parcel.

As If Improved: Where any value for improvements is part of the total valuation, we are of the opinion that the present improvements produce a higher value for the property than if the site was vacant. In appraisal theory, the present use is therefore the highest and best (as improved) of the subject property, though it could be an interim use.

Standards and Measurement of Data Accuracy

Sales were verified with the purchaser, seller or real estate agent where possible. Current data was verified via field inspection and corrected. Data was collected and coded per the assessor's residential procedures manual.

Physical Inspection Process... Continued

We maintain uniformity with respect to building characteristics such as year-built, quality, condition, living area, stories, and land characteristics such as location (sub-area and plat), lot size, views, and waterfront. Other variables that are unique to the specific areas are also investigated. This approach ensures that values are equitable for all properties with respect to all measurable characteristics, whether the houses are larger or smaller, higher or lower quality, remodeled or not, with or without views or waterfront, etc.

Special Assumptions and Limiting Conditions

The sales comparison and cost approaches to value were considered for this mass appraisal valuation. After the sales verification process, the appraiser concluded that the market participants typically do not consider an income approach to value. Therefore the income approach is not applicable in this appraisal as these properties are not typically leased, but rather owner occupied. The income approach to value was not considered in the valuation of this area.

The following Departmental guidelines were considered and adhered to:

- Sales from 1/1/2012 to 12/31/2014 (at minimum) were considered in all analyses.
- Sales were time adjusted to 1/1/2015.
- This report is intended to meet the requirements of the Uniform Standards of Professional Appraisal Practice Standard 6.

Area Information

Name or Designation

Area 014 - Leschi/ Madison Park

Boundaries

Area 14 is bounded by Lake Washington on the North and the East. The southern boundary is S Andover Street. The western boundary is the Arboretum on the North, then 34th Avenue E from E Harrison Street to E John Street, then 33rd Avenue E to E Howell Street, 32nd Avenue E to E Yesler Way, 31st Avenue S to S McClellan Street, 31st Avenue S and 30th Avenue S to Mount Baker Boulevard, 36th Avenue S to S Hanford Street, 38th Avenue S to S Spokane Street, 39th Avenue S to S Court Street, then Cascadia Avenue S to S Andover Street

Maps

A general map of the area is included in this report. More detailed Assessor's maps are located on the 7th floor of the King County Administration Building.

Area Description

Area 14 is an extremely diverse area with sales of non-waterfront properties ranging from \$280,000 to \$7,650,000. The average sale price per neighborhood is listed in the land portion of this report. Overall, the average sale price for Area 14 during the years from 01/2012 to 01/2015 was \$1,210,095. During this same time period; the average sale for non-waterfront improved properties was \$1,192,959 and the average sale for waterfront improved properties was \$3,126,512

Area 14 is divided into three Sub Areas:

Sub Area 6 is the smallest of the three sub areas and is located in the Northwest portion of Area 14. It is comprised entirely of Neighborhood 90 (Broadmoor). It has easy access to Seattle's downtown business district via E Madison, to State Route 520, and to Interstate 5. It is also within close proximity to the Madison Park businesses and restaurants, has easy access to the Arboretum, and to Madison Park beach.

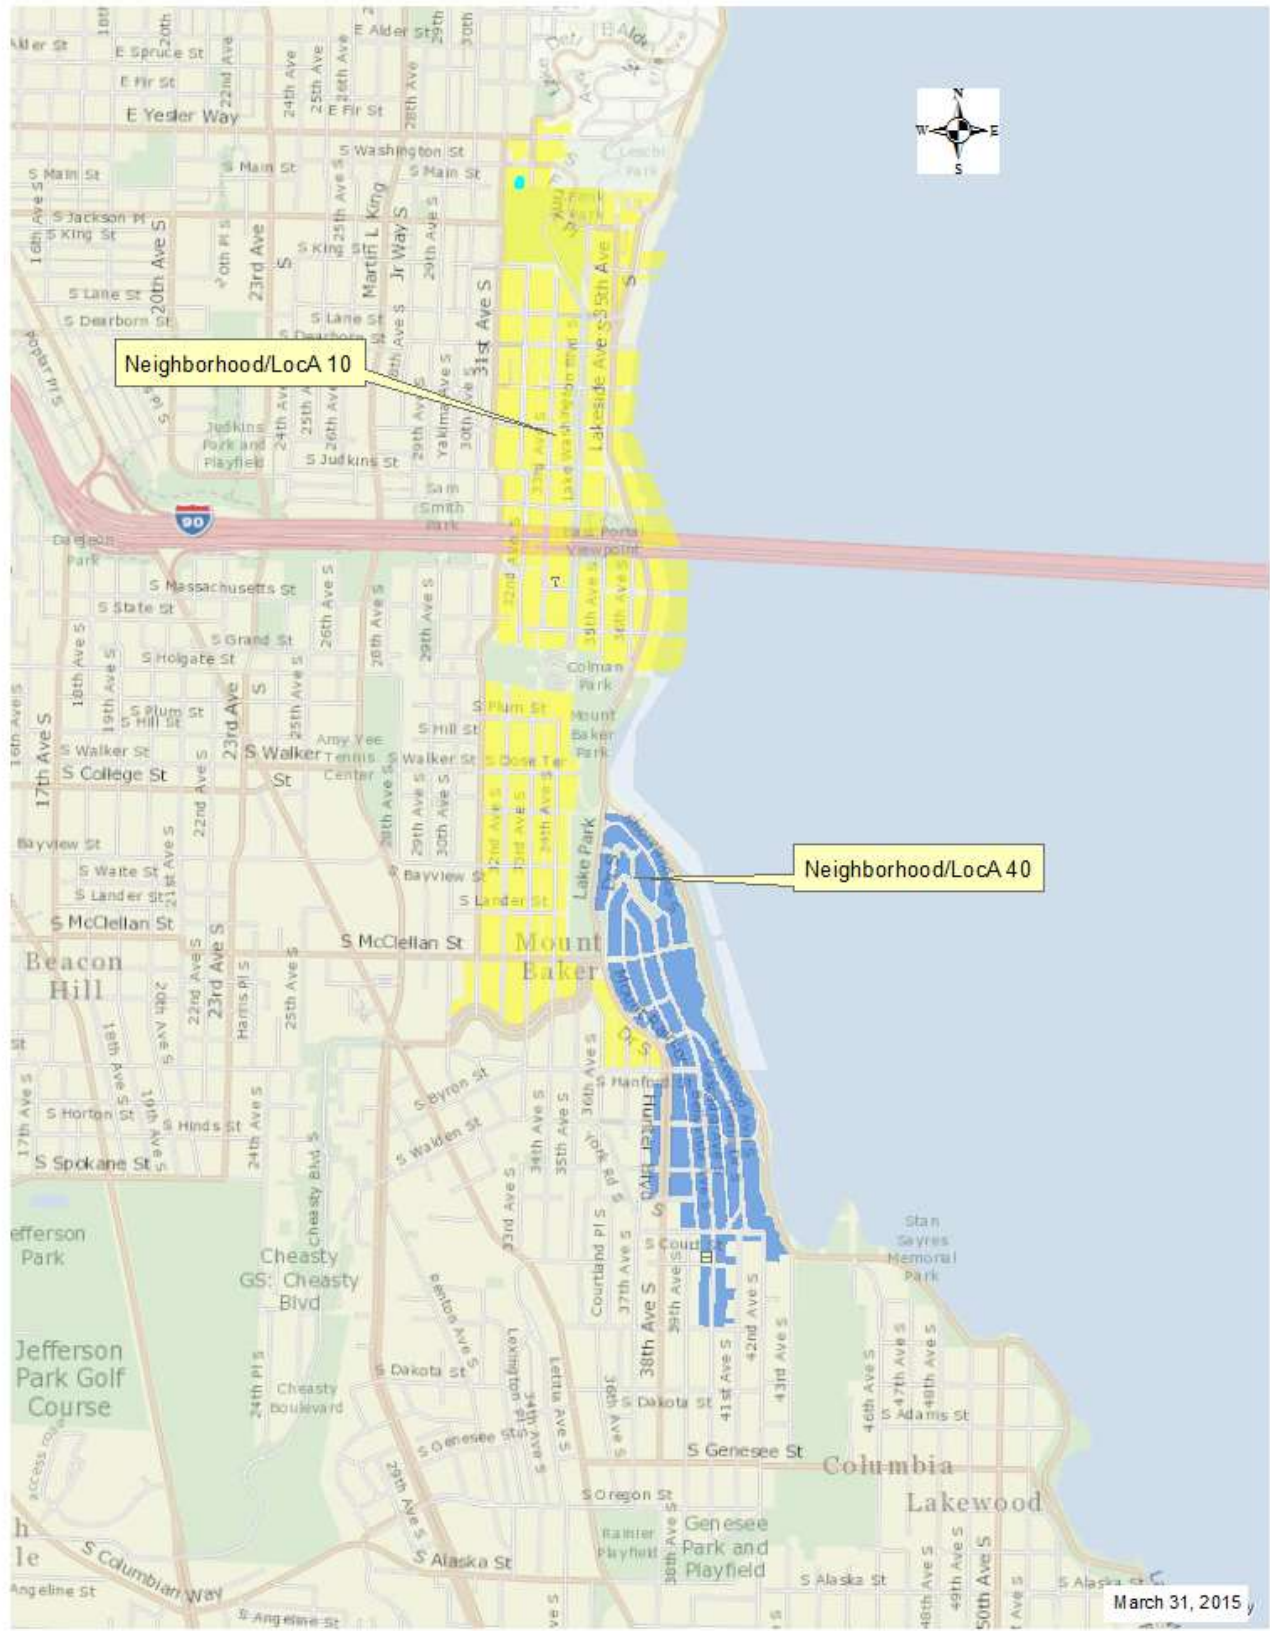

Sub Area 7 is mostly comprised of the Madison Park and Washington Park neighborhoods and is located in the Northeast portion of Area 14. The highest building grades and land values are concentrated in this area. It includes the small commercial area of Madison Park, which has numerous small businesses and restaurants, and includes the Madison Park Beach. E Madison bisects Sub Area 7, providing easy access to Seattle's downtown business district, and the area has easy access to State Route 520 and to Interstate 5. Many parcels in this area enjoy Lake Washington views, but are also impacted by topography.

Sub Area 8 is the largest of the three sub areas comprising approximately the south two thirds of Area 14. It includes the Madrona, Leschi and Mt. Baker neighborhoods. It has easy access to the I-90 corridor, as well as to the downtown Seattle business district via numerous arterial routes. It also includes the small Leschi business district, numerous public parks, beaches, marinas, and the Seattle Tennis Club. Many of the properties in this sub-area enjoy Lake Washington views, but are also impacted by topography.

Neighborhood 80 & 90 Map

Land Valuation

Vacant sales from 1/1/2012 to 12/31/2014 were given primary consideration for valuing land with emphasis placed on those sales closest to January 1, 2015.

Area 14 contains 4640 parcels of which approximately 4% are vacant. Location, views, topography, lot size, traffic and waterfront footage are primary influences to land values. There were a very limited number of vacant parcel sales in Area 14 during the last three years. The Sales Comparison approach was utilized to determine land value which was supplemented by the analysis of allocated land values from improved properties. Tear down sales were also analyzed as supporting evidence, as this is the primary source for new construction sites in the area. 12, true vacant sales were available for land value development for Area 14.

A typical 5,000 square foot, non-view, SF 5000 zoned lot has a value of \$253,000 to \$726,000 based on neighborhood.

Based primarily on location and building grade, nine neighborhoods have been identified within Area 14. While these neighborhoods tend to be distinct, there is no clear boundary between them; rather gradual differences that increase with distance. These areas have been assigned neighborhood codes primarily as a means of identifying the different land values within them. The attached Area map indicates the identified neighborhoods on the map with each titled, "Neighborhood/LocA".

To allow a smoothing of adjacent neighborhoods, a Geostatistical Surface Analysis was performed. This analysis has resulted in model improvements which reduced the need for location or "micro neighborhood" adjustments. This analysis is further described in the Improved Model portion of this report and is designated Neighborhood LocB as indicated by the right digit of the neighborhood code.

Neighborhood 10 (LocA 1) is located directly south of Neighborhood 20 and north of Neighborhood 40 and includes portions of Mt. Baker and Leschi. Approximately 25% of the parcels in Area 14 are located in this neighborhood. It is impacted by its proximity to I- 90 freeway noise and topography issues. Homes in this neighborhood are typically Grade 7's and 8's; though there are higher grades also represented along the waterfront. There are 48 waterfront parcels in this neighborhood and approximately 49% of parcels in this area enjoy Lake Washington views. Nearly all the available land has been built upon and therefore the trend is toward home Improvement, and renovation of existing structures. Average sale price of non-waterfront improved parcels in this neighborhood is \$927,230.

Neighborhood 20 (LocA 2) is directly north of Neighborhood 10 and includes the neighborhood of Leschi. Approximately 6% of the parcels in Area 14 are located in this neighborhood. This area is impacted by topography issues. Homes in this neighborhood are typically Grade 8's and 9's. Approximately 60% of parcels in this neighborhood enjoy Lake Washington views. Nearly all the available land has been built upon and therefore the trend is toward home improvements and renovation of existing structures. Average sale price of non-waterfront improved parcels in this neighborhood is \$850,029.

Neighborhood 30 (LocA 3) is directly north of Neighborhood 20 and includes the Madrona neighborhood. Approximately 19% of the parcels in Area 14 are located in this neighborhood. This area is impacted by significant topography issues as well as the proximity of many of the dwellings to the Bush School. Approximately 36% of parcels in this neighborhood enjoy Lake Washington views. Homes in this neighborhood are typically Grade 8's and 9's. Nearly all the available land has been built upon

and therefore the trend is toward home improvements and renovation of existing structures. Average sale price of non-waterfront improved parcels in this neighborhood is \$1,080,157.

Neighborhood 40 (LocA 4) includes the Mount Baker community which was previously valued with Area 81 (Seward Park). Approximately 7% of the parcels in Area 14 are located in this neighborhood. Homes in this neighborhood are typically Grade 8's, 9's, and 10's. Approximately 54% of parcels in this neighborhood enjoy Lake Washington views. Nearly all the available land has been built upon and therefore the trend is toward home improvements and renovation of existing structures. Average sale price of non-waterfront improved parcels in this neighborhood is \$1,298,588.

Neighborhood 50 (LocA 5) is the Denny Blaine neighborhood, located directly north of Neighborhood 30 and west of Neighborhood 70. Approximately 2% of the parcels in Area 14 are located in this neighborhood. This area is impacted by topography issues. Homes in this neighborhood are typically Grade 9's and 10's. Approximately 59% of parcels in this neighborhood enjoy Lake Washington views. Nearly all the available land has been built upon and therefore the trend is toward home improvements and renovation of existing structures. Average sale price of non-waterfront improved parcels in this neighborhood is \$2,294,300.

Neighborhood 60 (LocA 6) is directly west of Neighborhoods 50 and 70 and is a transitional neighborhood between Area 15 (Central District) and Area 14. Approximately 10% of the parcels in Area 14 are located in this neighborhood. Because it is a transitional neighborhood it is not completely contiguous, as it is interrupted by areas with higher grade dwellings that are included with adjacent neighborhoods, or by commercial properties. There is virtually no Lake Washington views in this neighborhood. This area is impacted by topography issues. Homes in this neighborhood are typically Grade 7's and 8's. The average sale price of non-waterfront improved parcels in this neighborhood is \$748,828.

Neighborhood 70 (LocA 7) is directly North of Neighborhood 30 and includes the Washington Park neighborhood. This area is impacted by some topography issues. Approximately 8% of the parcels in Area 14 are located in this neighborhood. Homes in this neighborhood are typically Grade 9's, 10's, and 11's; and there are a significant number of higher grade homes in the neighborhood which includes 39 grade 12's and 23 grade 13 mansions. This neighborhood includes 61 waterfront parcels and approximately 49% of the parcels in this area enjoy Lake Washington views. Nearly all the available land has been built upon and therefore the trend is toward home improvements and renovation of existing structures. The average sale price of non-waterfront improved parcels in this neighborhood is \$2,327,226.

Neighborhood 80 (LocA 8) is directly North of Neighborhood 70 and includes Madison Park. Approximately 16% of the parcels in Area 14 are located in this neighborhood. It has a wide range of building grades, and many of the modest grade dwellings are being torn down to make way for new higher grade improvements, resulting in increasing land values. Madison Park has numerous shops and restaurants and many of the dwellings are within walking distance to these amenities, as well as to beach access. This area is relatively flat and not impacted by topography issues. Homes in this neighborhood are typically Grade 8's and 9's. There are 15 waterfront parcels in this neighborhood, but the waterfront properties are diminished by proximity to the 520 Floating Bridge. Only 3% of parcels in this area enjoy Lake Washington views. Nearly all the available land has been built upon and therefore the trend is toward home improvements and renovation of existing structures. Average sale price of non-waterfront improved parcels in this neighborhood is \$1,240,817.

Neighborhood 90 (LocA 9) is Broadmoor, a gated, entrance guarded, private development which features a private golf course within its boundaries. Approximately 7% of the parcels in Area 14 are located in this neighborhood. Sales of properties in Broadmoor require approval of the Home Owners Association, as well as a special assessment paid to the association upon completed purchase. This exclusive area is relatively flat and not impacted by topography. Homes are typically in the 9 and 10 grade categories. There 101 parcels situated adjacent to the golf course, but there are no Lake Washington views in this neighborhood. Average sale price of non-waterfront improved parcels in this neighborhood is \$1,962,431.

Waterfront Properties

Area 14 includes 124 Lake Washington waterfront properties. These properties typically have higher grade homes than the neighborhoods in which are they located. There are three neighborhoods that contain waterfront properties; Neighborhood 10 and Neighborhood 70 have Lake Washington to the East and enjoy excellent views of Lake Washington, the Cascade Mountains, and often Mt Rainier; and Neighborhood 80 has Lake Washington to the North and is impacted with view degradation and traffic noise from the 520 Floating Bridge. The average sale for waterfront improved properties in Area 14 was \$3,051,296. The average sale for waterfront improved properties was \$1,973,100 in neighborhood 10 and \$5,150,000 in neighborhood 70. There were no improved waterfront market sales in neighborhood 80.

Topography Adjustment

All parcels were coded for topography based upon GIS analysis of King County topography contours overlay and city of Seattle overlays. Parcels in which topography was coded were analyzed to determine if an adjustment was needed. Those parcels in which topography has a negative impact on values were adjusted from -10% to -90% (based on sales and appraiser judgment).

Topography issues can cause a reduction in values by either reducing the site's utility or by significantly increasing the costs to develop the parcel into a building site. The amount of this cost to cure is expressed as a percentage of base land value and is shown in the 'percent base land value' impact field (%BLV) of Real Property. For improved parcels falling into the latter situation the costs of development have been reflected in the improvement value. This adjustment considers that after an improvement has been placed on a parcel, the cost to cure for topography has been realized as additional building costs and is best reflected in the improved value. The amount of extra construction cost has been shifted from land to improvement.

Land Model

Model Development, Description and Conclusions

12 vacant land sales from Area 14 were used to derive land value. Data on lot size, location, topography, access, utilities, adjacent to golf course, views, and water frontage were considered while developing the land model. The sales comparison approach and appraisal judgement were used to determine land value. Land abstraction method was used for tear down sales.

A list of vacant sales used and those considered not reflective of market are included in the following sections.

Land Value Model Calibration

Lot Size (Sqft.)	Base Land Value
500	\$240,000
1,000	\$284,000
1,500	\$328,000
2,000	\$354,000

Neighborhood Adjustments	Base Land Value Adjustment
10	55% of Base Land Value
20	75% of Base Land Value
30	80% of Base Land Value
40	65% of Base Land Value
50	130% of Base Land Value
60	60% of Base Land Value
70	145% of Base Land Value
80	120% of Base Land Value
90	100% of Base Land Value
Land values are not interpolated	
Waterfront	
Neighborhood	Per Foot Adjustment
10	\$15,000
70	\$20,000
80	\$5,000
Land Value Calculation Example 1:	
Neighborhood: 50	
Traffic Noise: High	
Lot Size: 7,500	
View: Good Territorial	
Base Land Value per Land Schedule: \$772,000	
Neighborhood Adjustment: *1.30	
BLV with Nghb Adj Calculation: $\$772,000 * 1.30 = \$1,003,000$	
Traffic Adjustment: -20%	
View Adjustment: +10%	
Net Total Adjustment Calculation: $-20\% + 10\% = -10\%$	
Final Land Calculation $\$1,003,000 * .90 = \$902,000$	
Land Value Calculation Example 2:	
Neighborhood: 10	
Traffic Noise: Moderate	
Lot Size: 6,000	
View: Excellent Lake Washington	
Waterfront Feet: 50	
Base Land Value per Land Schedule: \$688,000	
Neighborhood Adjustment: *.55	
Base Land with Nghd Adjustment Applied: \$378,000	
Traffic Adjustment: -10%	
View Adjustment: +80%	
Net Total Adjustment Calculation: $-10\% + 80\% = 70\%$	
Land Calculation $\$378,000 * 1.70 = \$642,000$	
Waterfront Adjustment: 50 feet * \$15,000 = \$750,000	
Final Land Calculation: $\$642,000 + \$750,000 = \$1,392,000$

Adjustments:	
<p>It should be noted that only the highest view adjustment will be applied to a parcel. If a parcel has Excellent Lake Washington view (80%), Excellent Terr. view (15%) and Good Mt. Rainier view (10%), the highest adjustment (80%) will be applied.</p>	
<p>Negative Adjustments: Are cumulative.</p> <p>If a parcel has heavy traffic noise (-20%) and topography code 3 (-30%), the base land value of the parcel receives a 50% downward adjustment.</p>	
Appraiser judgement may override any land schedule value.	
Large Lots-Developable Parcels:	
<p>Land value considers the number of underlying platted lots, and the number of potential lots allowed within the zoning. Additionally, information from builders and developers as well as historical data is considered. As always, appraiser judgment applies and there may be exceptions to this methodology. These types of parcels are typically handled on an individual basis.</p>	
<p>Lots with townhouse plats were equalized to account for larger parcels being impacted by parking or access for small lots within the plat.</p>	
<p>Negative and positive adjustments apply to all base land values. However, in all cases appraiser judgment prevailed.</p>	

Improved Parcel Valuation

Improved Parcel Data:

Sales information is obtained from excise tax affidavits and reviewed initially by the Accounting Division, Sales Identification Section. Information is analyzed and investigated by the appraiser in the process of revaluation. All sales were verified if possible by calling either the purchaser or seller, inquiring in the field or calling the real estate agent. Characteristic data is verified for all sales if possible. Due to time constraints, interior inspections were limited. Sales are listed in the “Improved Sales Used In This Physical Inspection Analysis” and “Improved Sales Removed From This Physical Inspection Analysis” sections of this report. Additional information may reside in the Assessor’s Real Property Database, Assessor’s procedures, Assessor’s “field” maps, Revalue Plan, separate studies, and statutes.

The Assessor maintains a cost model, which is specified by the physical characteristics of the improvement, such as first floor area, second floor area, total basement area, and number of bathrooms. The cost for each component is further calibrated to the 13 grades to account for quality of construction. Reconstruction Cost New (RCN) is calculated from adding up the cost of each component. Depreciation is then applied by means of a percent good table which is based on year built, grade, and condition, resulting in Reconstruction Cost New less Depreciation (RCNLD). The appraiser can make further adjustments for obsolescence (poor floor plan, design deficiencies, external nuisances etc.) if needed. The Assessor’s cost model generates RCN and RCNLD for principal improvements and accessories such as detached garages and pools.

The Assessor’s cost model was developed by the King County Department of Assessments in the early 1970’s. It was recalibrated in 1990 to roughly approximate Marshall & Swift’s square foot cost tables, and is indexed annually to keep up with current costs.

Model Development, Description and Conclusions:

Most sales were field verified and characteristics updated prior to model development. Sales were time adjusted to 1/1/2015.

The analysis of this area consisted of a systematic review of applicable characteristics which influence property values

In addition to standard physical property characteristics, the analysis showed Heavy Traffic, improvements in Good and Very Good Condition, New Houses (built or renovated in 2000 or later), Building Grades higher than grade 10, properties with Good and Excellent Lake Washington Views, properties with View Utility, properties with Lake Washington Waterfront, and those properties located in Leschi (Neighborhoods 10 & 20), Denny-Blaine (Neighborhood 50), Washington Park (Neighborhood 70), Madison Park (Neighborhood 80), and Broadmoor (Neighborhood 90) were influential in the market.

Neighborhood LocA is the first digit of the neighborhood code and reflects the standard neighborhood codes. Area 14 has nine neighborhoods (10, 20, 30, 40, 50, 60, 70, 80, and 90).

Neighborhood LocB is the second digit of the neighborhood code and was determined by analyzing the improvements grade and using geostatistical analysis in ArcView Geostatistical Analyst. The range of LocB values is 1-6. This analysis provided a model which reflects the geospatial relationships of improvements in Area 14. This model is based upon the similarity of the improvements to each other

Improved Parcel Valuation

and is intended to provide “feathering” between neighborhoods. The EMV formula used was derived through regression analysis in NCSS.

A list of improved sales used and those considered not reflective of market are included in the following sections

Improved Parcel Total Value Model Calibration

Variable	Definition
Sale Day	Time Adjustment

EMV values were not generated for:

- Buildings with grade less than 4
- Lot size less than 100 square feet
- Building two or greater. (EMV is generated for building one only.)
- If total EMV is less than base land value
- If LocA = 0
- If LocB = 0
- If Base land value = 0
- If Net Condition > 0

Improved Parcel Total Value Model Calibration

Of the 4298 improved parcels in the population, 3876 parcels increased in value. They were comprised of 6 single family residences on commercially zoned land and 3870 single family residences or other parcels.

Of the 126 vacant land parcels greater than \$1000, 89 parcels increased in value. Tax exempt parcels were excluded from the number of parcels increased.

Supplemental Models and Exceptions

Accessory Only: Total Replacement Cost New Less Depreciation (RCNLD)

Poor Condition: New Land + Building RCNLD, or New Land + Value in Use.

Multiple Improvements: EMV for Imp 1 + Building RCNLD for each additional improvement, with some exceptions as noted.

EMV Less Than New Land: New Land + Building RCNLD, or New Land + Value in Use.

Grade 12 and higher improvements in Neighborhoods 30, 50 and 70 were valued at EMV * 1.10

Grade 20 parcels are considered exceptions and are not included in this report. There are two Grade 20 properties in Area 14.

Seattle Tennis Club was also considered an exception parcel and was valued at new land value based upon the current land table, plus a previous improvement value which had been established by the commercial division.

Micro Neighborhoods were identified and adjusted as follows:

The base land values for parcels located in Neighborhood 60, north of E Madison Street, were valued using Neighborhood 90 base land value * .90.

The parcels in Neighborhood 10, south of E Yesler Way, west of Leschi Park, north of Frink Park, and east of 31st Avenue S were valued at EMV * .85.

The parcels in Neighborhood 50 south of E Olive, fronting 39th Avenue to the end of the street and the parcels south of E Olive, fronting 40th Avenue to the end of the street were valued at EMV * 1.20.

The parcels in Neighborhood 60, bounded by E Spring Street to the north, the west side of 33rd Avenue down to E Cherry Street, then along the west and east sides of 33rd Avenue to E Spruce Street to the east, E Spruce Street to the south, and 32nd Avenue to the west were valued at EMV * .90.

The following parcels in Neighborhood 70 along Hillside Drive E were valued at EMV *.75: Major: 531710, and Minors: 0482, 0495, 0504, 0510, 0516, 0520, 0525, 0545, 0558, 0565, 0575, 0595, 0600, 0605, 0610, 0611, 0612, 0614.

The land value for Single Family Zoned Waterfront Parcels in Neighborhood 80 were valued at Base land value * .55.

Whenever supplemental models and exceptions were applied appraiser judgment prevailed, and a note explaining the valuation method was left in Real Property.

Area 014 Market Value Changes Over Time

In a changing market, recognition of a sales trend to adjust a population of sold properties to a common date is required to allow for value differences over time between a range of sales dates and the assessment date. The following chart shows the % time adjustment required for sales to reflect the indicated market value as of the assessment date, **January 1, 2015**.

For example, a sale of \$475,000 which occurred on October 1, 2013 would be adjusted by the time trend factor of 1.131, resulting in an adjusted value of \$537,000 ($\$475,000 \times 1.131 = \$537,225$) – truncated to the nearest \$1000.

SaleDate	Adjustment (Factor)	Equivalent Percent
1/1/2012	1.344	34.4%
2/1/2012	1.333	33.3%
3/1/2012	1.323	32.3%
4/1/2012	1.312	31.2%
5/1/2012	1.301	30.1%
6/1/2012	1.290	29.0%

11/1/2014	1.017	1.7%
12/1/2014	1.008	0.8%
1/1/2015	1.000	0.0%

Area 014 Market Value Changes Over Time

The time adjustment formula for Area 014 is: $1/EXP (+ 0.000269844738268299 * SaleDay)$
 $SaleDay = SaleDate - 42005$

Results

Appraiser judgment prevails in all decisions regarding individual parcel valuation. Each parcel is field reviewed and a value selected based on general and specific data pertaining to the parcel, the neighborhood, and the market. The appraiser determines which available value estimate may be appropriate. This value estimate may be adjusted based on particular characteristics and conditions as they occur in the valuation area.

The resulting assessment level is 93.8%. The standard statistical measures of valuation performance are all within the IAAO recommended range of .90 to 1.10.

Application of these recommended values for the 2015 assessment year (taxes payable in 2016) results in an average total change from the 2014 assessments of +12.1%. This increase is due partly to market changes over time and the previous assessment levels.

A Ratio Study was completed just prior to the application of the 2015 recommended values. This study benchmarks the prior assessment level using 2014 posted values (1/1/2014) compared to current adjusted sale prices (1/1/2015). The study was also repeated after the application of the 2015 recommended values. The results show an improvement in the COD from 12.57% to 10.32%.

The Appraisal Team recommends application of the Appraiser selected values, as indicated by the appropriate model or method.

Note: More details and information regarding aspects of the valuations and the report are retained in the working files kept in the appropriate district office.

Client and Intended Use of the Appraisal:

This mass appraisal report is intended for use by the public, King County Assessor and other agencies or departments administering or confirming ad valorem property taxes. Use of this report by others for other purposes is not intended by the appraiser. The use of this appraisal, analyses and conclusions is limited to the administration of ad valorem property taxes in accordance with Washington State law. As such it is written in concise form to minimize paperwork. The assessor intends that this report conform to the Uniform Standards of Professional Appraisal Practice (USPAP) requirements for a mass appraisal report as stated in USPAP SR 6-8. To fully understand this report the reader may need to refer to the Assessor's Property Record Files, Assessors Real Property Data Base, separate studies, Assessor's Procedures, Assessor's field maps, Revalue Plan and the statutes.

The purpose of this report is to explain and document the methods, data and analysis used in the revaluation of King County. King County is on a six year physical inspection cycle with annual statistical updates. The revaluation plan is approved by Washington State Department of Revenue. The Revaluation Plan is subject to their periodic review.

Definition and date of value estimate:

Market Value

The basis of all assessments is the true and fair value of property. True and fair value means market value (Spokane etc. R. Company v. Spokane County, 75 Wash. 72 (1913); Mason County Overtaxed, Inc. v. Mason County, 62 Wn. 2d (1963); AGO 57-58, No. 2, 1/8/57; AGO 65-66, No. 65, 12/31/65).

The true and fair value of a property in money for property tax valuation purposes is its "market value" or amount of money a buyer willing but not obligated to buy would pay for it to a seller willing but not obligated to sell. In arriving at a determination of such value, the assessing officer can consider only those factors which can within reason be said to affect the price in negotiations between a willing purchaser and a willing seller, and he must consider all of such factors. (AGO 65,66, No. 65, 12/31/65)

Retrospective market values are reported herein because the date of the report is subsequent to the effective date of valuation. The analysis reflects market conditions that existed on the effective date of appraisal.

Highest and Best Use

RCW 84.40.030

All property shall be valued at one hundred percent of its true and fair value in money and assessed on the same basis unless specifically provided otherwise by law.

An assessment may not be determined by a method that assumes a land usage or highest and best use not permitted, for that property being appraised, under existing zoning or land use planning ordinances or statutes or other government restrictions.

USPAP Compliance...Continued

WAC 458-07-030 (3) True and fair value -- Highest and best use.

Unless specifically provided otherwise by statute, all property shall be valued on the basis of its highest and best use for assessment purposes. Highest and best use is the most profitable, likely use to which a property can be put. It is the use which will yield the highest return on the owner's investment. Any reasonable use to which the property may be put may be taken into consideration and if it is peculiarly adapted to some particular use, that fact may be taken into consideration. Uses that are within the realm of possibility, but not reasonably probable of occurrence, shall not be considered in valuing property at its highest and best use.

If a property is particularly adapted to some particular use this fact may be taken into consideration in estimating the highest and best use. (Sammish Gun Club v. Skagit County, 118 Wash. 578 (1922))

The present use of the property may constitute its highest and best use. The appraiser shall, however, consider the uses to which similar property similarly located is being put. (Finch v. Grays Harbor County, 121 Wash. 486 (1922))

The fact that the owner of the property chooses to use it for less productive purposes than similar land is being used shall be ignored in the highest and best use estimate. (Sammish Gun Club v. Skagit County, 118 Wash. 578 (1922))

Where land has been classified or zoned as to its use, the county assessor may consider this fact, but he shall not be bound to such zoning in exercising his judgment as to the highest and best use of the property. (AGO 63-64, No. 107, 6/6/64)

Date of Value Estimate

RCW 84.36.005

All property now existing, or that is hereafter created or brought into this state, shall be subject to assessment and taxation for state, county, and other taxing district purposes, upon equalized valuations thereof, fixed with reference thereto on the first day of January at twelve o'clock meridian in each year, excepting such as is exempted from taxation by law.

RCW 36.21.080

The county assessor is authorized to place any property that is increased in value due to construction or alteration for which a building permit was issued, or should have been issued, under chapter 19.27, 19.27A, or 19.28 RCW or other laws providing for building permits on the assessment rolls for the purposes of tax levy up to August 31st of each year. The assessed valuation of the property shall be considered as of July 31st of that year.

Reference should be made to the property card or computer file as to when each property was valued. Sales consummating before and after the appraisal date may be used and are analyzed as to their indication of value at the date of valuation. If market conditions have changed then the appraisal will state a logical cutoff date after which no market date is used as an indicator of value.

Property Rights Appraised: Fee Simple

Wash Constitution Article 7 § 1 Taxation:

All taxes shall be uniform upon the same class of property within the territorial limits of the authority levying the tax and shall be levied and collected for public purposes only. The word "property" as used herein shall mean and include everything, whether tangible or intangible, subject to ownership. All real estate shall constitute one class.

Trimble v. Seattle, 231 U.S. 683, 689, 58 L. Ed. 435, 34 S. Ct. 218 (1914)

...the entire [fee] estate is to be assessed and taxed as a unit...

Folsom v. Spokane County, 111 Wn. 2d 256 (1988)

...the ultimate appraisal should endeavor to arrive at the fair market value of the property as if it were an unencumbered fee...

The Dictionary of Real Estate Appraisal, 3rd Addition, Appraisal Institute.

Absolute ownership unencumbered by any other interest or estate, subject only to the limitations imposed by the governmental powers of taxation, eminent domain, police power, and escheat.

Assumptions and Limiting Conditions:

1. No opinion as to title is rendered. Data on ownership and legal description were obtained from public records. Title is assumed to be marketable and free and clear of all liens and encumbrances, easements and restrictions unless shown on maps or property record files. The property is appraised assuming it to be under responsible ownership and competent management and available for its highest and best use.
2. No engineering survey has been made by the appraiser. Except as specifically stated, data relative to size and area were taken from sources considered reliable, and no encroachment of real property improvements is assumed to exist.
3. No responsibility for hidden defects or conformity to specific governmental requirements, such as fire, building and safety, earthquake, or occupancy codes, can be assumed without provision of specific professional or governmental inspections.
4. Rental areas herein discussed have been calculated in accord with generally accepted industry standards.
5. The projections included in this report are utilized to assist in the valuation process and are based on current market conditions and anticipated short term supply demand factors. Therefore, the projections are subject to changes in future conditions that cannot be accurately predicted by the appraiser and could affect the future income or value projections.
6. The property is assumed uncontaminated unless the owner comes forward to the Assessor and provides other information.
7. The appraiser is not qualified to detect the existence of potentially hazardous material which may or may not be present on or near the property. The existence of such substances may have an effect on the value of the property. No consideration has been given in this analysis to any potential diminution in value should such hazardous materials be found (unless specifically noted). We urge the taxpayer to retain an expert in the field and submit data affecting value to the assessor.

USPAP Compliance...Continued

8. No opinion is intended to be expressed for legal matters or that would require specialized investigation or knowledge beyond that ordinarily employed by real estate appraisers, although such matters may be discussed in the report.
9. Maps, plats and exhibits included herein are for illustration only, as an aid in visualizing matters discussed within the report. They should not be considered as surveys or relied upon for any other purpose.
10. The appraisal is the valuation of the fee simple interest. Unless shown on the Assessor's parcel maps, easements adversely affecting property value were not considered.
11. An attempt to segregate personal property from the real estate in this appraisal has been made.
12. Items which are considered to be "typical finish" and generally included in a real property transfer, but are legally considered leasehold improvements are included in the valuation unless otherwise noted.
13. The movable equipment and/or fixtures have not been appraised as part of the real estate. The identifiable permanently fixed equipment has been appraised in accordance with RCW 84.04.090 and WAC 458-12-010.
14. I have considered the effect of value of those anticipated public and private improvements of which I have common knowledge. I can make no special effort to contact the various jurisdictions to determine the extent of their public improvements.
15. Exterior inspections were made of all properties in the physical inspection areas (outlined in the body of the report) however; due to lack of access and time few received interior inspections.

Scope of Work Performed:

Research and analyses performed are identified in the body of the revaluation report. The assessor has no access to title reports and other documents. Because of legal limitations we did not research such items as easements, restrictions, encumbrances, leases, reservations, covenants, contracts, declarations and special assessments. Disclosure of interior home features and, actual income and expenses by property owners is not a requirement by law therefore attempts to obtain and analyze this information are not always successful. The mass appraisal performed must be completed in the time limits indicated in the Revaluation Plan and as budgeted. The scope of work performed and disclosure of research and analyses not performed are identified throughout the body of the report.

Certification:

I certify that, to the best of my knowledge and belief:

- The statements of fact contained in this report are true and correct
- The report analyses, opinions, and conclusions are limited only by the reported assumptions and limiting conditions and are my personal, impartial, and unbiased professional analyses, opinions, and conclusions.
- I have no present or prospective interest in the property that is the subject of this report and no personal interest with respect to the parties involved.
- I have no bias with respect to the property that is the subject of this report or to the parties involved.
- My engagement in this assignment was not contingent upon developing or reporting predetermined results.
- My compensation for completing this assignment is not contingent upon the development or reporting of predetermined value or direction in value that favors the cause of the client, the amount of the value opinion, the attainment of a stipulated result, or the occurrence of a subsequent event directly related to the intended use of this appraisal.

USPAP Compliance...Continued

- My analyses, opinions, and conclusions were developed, and this report has been prepared, in conformity with the Uniform Standards of Professional Appraisal Practice.
- The area(s) physically inspected for purposes of this revaluation are outlined in the body of this report.
- The individuals listed below were part of the "appraisal team" and provided significant real property appraisal assistance to the person signing this certification. Any services regarding the subject area performed by the appraiser within the prior three years, as an appraiser or in any other capacity is listed adjacent their name.
- To the best of my knowledge the following services were performed by the appraisal team within the subject area in the last three years:
 - David Ek, David McCroskey, Adam Neel, and Andrew Rose performed:
 - Data Collection
 - Sales Verification
 - Appeals Response Preparation / Review
 - Appeal Hearing Attendance
 - Land and Total Valuation
 - New Construction Evaluation
- Any services regarding the subject area performed by me within the prior three years, as an appraiser or in any other capacity is listed adjacent to my name.
- To the best of my knowledge the following services were performed by me within the subject area in the last three years:
 - Karen Anderson performed:
 - Data Collection
 - Sales Verification
 - Appeals Response Preparation / Review
 - Appeal Hearing Attendance
 - Physical Inspection Model Development and Report Preparation
 - Land and Total Valuation
 - New Construction Evaluation

Lloyd Hara

As we start preparations for the 2015 property assessments, it is helpful to remember that the mission and work of the Assessor's Office sets the foundation for efficient and effective government and is vital to ensure adequate funding for services in our communities. Maintaining the public's confidence in our property tax system requires that we build on a track record of fairness, equity, and uniformity in property assessments. Though we face ongoing economic challenges, I challenge each of us to seek out strategies for continuous improvement in our business processes.

Please follow these standards as you perform your tasks.

- Use all appropriate mass appraisal techniques as stated in Washington State Laws, Washington State Administrative Codes, Uniform Standards of Professional Appraisal Practice (USPAP), and accepted International Association of Assessing Officers (IAAO) standards and practices.
- Work with your supervisor on the development of the annual valuation plan and develop the scope of work for your portion of appraisal work assigned, including physical inspections and statistical updates of properties;
- Where applicable, validate correctness of physical characteristics and sales of all vacant and improved properties.
- Appraise land as if vacant and available for development to its highest and best use. The improvements are to be valued at their contribution to the total in compliance with applicable laws, codes and DOR guidelines. The Jurisdictional Exception is applied in cases where Federal, State or local laws or regulations preclude compliance with USPAP;
- Develop and validate valuation models as delineated by IAAO standards: Standard on Mass Appraisal of Real Property and Standard on Ratio Studies. Apply models uniformly to sold and unsold properties, so that ratio statistics can be accurately inferred to the entire population.
- Time adjust sales to January 1, 2015 in conformance with generally accepted appraisal practices.
- Prepare written reports in compliance with USPAP Standard 6 for Mass Appraisals. The intended users of your appraisals and the written reports include the public, Assessor, the Boards of Equalization and Tax Appeals, and potentially other governmental jurisdictions. The intended use of the appraisals and the written reports is the administration of ad valorem property taxation.
